URBAN DISTRICT OF DODWORTH.

ANNUAL REPORT

OF THE

Medical Officer of Health,

FOR THE

Year ending 31st December, 1937.

BARNSLEY :

R. E. Griffiths Ltd., Printers, &c., Hanson Street.

—
1938.

Dodworth Urban District Council.

REPORT OF THE Medical Officer of Health FOR THE YEAR 1937.

DODWORTH,

June, 1938.

Gentlemen,

The area of the Urban District is 1,917 acres. The census population in 1921 and 1931 was 3,390 and 4,248. In 1937 the estimated resident population was 4,065. In 1927 there were 936 houses ; in 1933, 969 houses ; and in 1937, 984 houses. The rateable value is £12,616, and the sum represented by a penny rate is £45 19s. 11d.

The occupation is almost entirely mining. There are no factories in the District.

Births.

The number of Live Births was 113 (68 males and 45 females). Of this total there were 6 illegitimate, 4 males and 2 females. This represents a Birth Rate of 27.8 per 1,000 persons living. The rate for England and Wales was 14.9.

There were 3 Still Births in the area during 1937, 2 males and 1 female, all legitimate ; a rate of 26 per 1,000 total births.

Deaths.

There were 48 Deaths (28 males and 20 females), a Death Rate of 11.8 per 1,000 persons living. The rate for England and Wales was 12.4. Some of the causes of death were:— Cancer, 8 ; Heart Disease, 8 ; other Circulatory Diseases, 11 ; Bronchitis, 1 ; Pneumonia, 2. There were no deaths from Puerperal Sepsis. One death resulted from other Puerperal causes, a rate of 8.62 per 1,000 Live and Still Births.

Infantile Deaths.

There were 6 Deaths among infants. This represents an Infantile Death Rate of 53 per 1,000 births. The rate for England and Wales was 58.

Four of the six deaths were ascribed to Congenital Debility and Premature Birth.

There was one death among the illegitimate children.

This represents a Death Rate among illegitimate infants of 166 per 1,000. The corresponding figure among legitimate infants was 47 per 1,000.

There were no deaths from Gastro-Enteritis, Measles, or Whooping Cough.

Public Health Officers.

GEO. HORNE, Medical Officer of Health (part time); HERBERT STRUTT, Sanitary Inspector and Surveyor. Both paid entirely by the local Council.

Laboratory Work.

Specimens are sent to the County Hall, Wakefield, for examination and report. Many specimens of Sputum and Diphtheria Swabs were sent in 1937.

Hospitals.

We have no Hospital or Institution for sickness in the Township. Fever and Diphtheria cases are sent to Kendray Hospital in Barnsley, whilst any Smallpox cases go to Lund Wood Hospital in Barnsley. Other cases are taken to the Barnsley Beckett Hospital, and to the Poor Law Hospital in Gawber.

Infectious cases are removed in the Barnsley Ambulance. Non-infectious and Accident cases are removed by private arrangement.

Nursing and Clinics.

Our District Nurse, supported entirely by voluntary subscriptions, does general nursing, but does not attend infectious cases, for which no provision is made.

The County Council provides a Nurse, who visits all the Schools in the District, and attends the Clinic and Babies Welfare, assisted by voluntary workers. The Maternity and Child Welfare Centre and the School Clinic are both held in three rooms at the Mechanics' Institute, the former once a week, the latter twice weekly.

We have no Tuberculosis or Venereal Clinics in Dodworth. The nearest are in Church Street and Queen's Road, Barnsley.

We have two Certificated Midwives.

Prevention of Blindness.

Any cases of Ophthalmia are reported by the Midwife. There were none in 1937.

Sanitary Inspection, 1937.

The Sewage Disposal Works have been constructed to provide for a population of 5,500, at an estimated dry weather flow of 20 gallons. per head, equal to 110,000 gallons. per day.

There are—

- 2 Detritus pits, total capacity 2,500 gallons.
- 2 Dry weather flow settling tanks, total capacity 65,000 gallons.
- 2 Filter beds, 80 ft. diameter, total capacity 2,900 c. yds.
- 2 Humus tanks, total capacity 14,200 gallons.
- 12 Dry weather flow mud drying beds, 833 sq. yds.
- 4 Mud beds to storm tanks, 280 sq. yds.

The old settling tanks are retained as storm tanks.

Swimming Pools.

There are no public Swimming Baths or Pools in the area.

Eradication of Bed Bugs.

One Council house and two other houses were disinfested by insecticide spray and fumigation, carried out by the Local Authority.

Schools.

The sanitary conditions and water supply are satisfactory.

Water Supply.

This is adequate and of good quality. The supply is constant, and the water has no action on lead. The supply is direct to all the dwelling-houses.

Housing.

1.—INSPECTION.

1.	Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts) ...	20
2.	Number of inspections made	3
3.	Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	6
4.	Number of dwelling-houses (exclusive of those referred to under the preceding sub-heading) found not to be in all respects reasonably fit for human habitation	6

2.—REMEDY OF DEFECTS.

Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authorities or their Officers	4
---	---

3.—ACTION UNDER STATUTORY POWERS.

Formal action under Statutory Powers was taken during the year in respect of one dwelling-house, which was then rendered fit by the owner.

4.—OVERCROWDING.

A.—1.	Number of dwellings overcrowded at end of year	62
2.	Do. families dwelling therein	80
3.	Do. persons do.	430
B.—	Do. new cases of overcrowding reported...	0
C.—1.	Do. cases of overcrowding relieved ...	1
2.	Do. persons concerned	10

This state of affairs will no longer exist when the new Council houses are completed in June, 1988.

Private Slaughterhouses.

All the Slaughterhouses were inspected several times during the year.

Inspection and Supervision of Meat and other Foods.

No cases of food contamination have had to be dealt with.

Carcasses Inspected and Condemned.

		Cattle excluding Cows	Cows	Calves	Sheep and Lambs	Pigs

Whole Carcasses condemned				1		
Carcasses of which some part or organ was condemned						
Percentage of the number inspected affected with disease other than Tuber- culosis45		
Tuberculosis only—						
Whole Carcasses condemned			1	6		
Carcasses of which some part or organ was condemned				1		
Percentage of the number inspected affected with Tuberculosis	1.16	3.15		

Cow Sheds and Milk Dealers.

There are 14 Cow Keepers in the District and 21 Cow Sheds. The Cow Sheds have all been inspected and deficiencies pointed out. Two veterinary inspections have been made and good reports given.

Tuberculosis.

We had 3 new cases notified during 1937 and 1 death.

Infectious Diseases.

The incidence of Notifiable Infectious Diseases for the period since 1929 is indicated in the following Table:—

	1929	1930	1931	1932	1933	1934	1935	1936	1937
Smallpox	...	21	1	0	0	0	0	0	0
Scarlet Fever	...	48	16	2	3	13	5	24	27
Diphtheria	...	2	1	0	1	1	2	14	6
Pneumonia	...	2	11	12	6	8	8	13	4
